

Project Design Phase-I

Solution Architecture

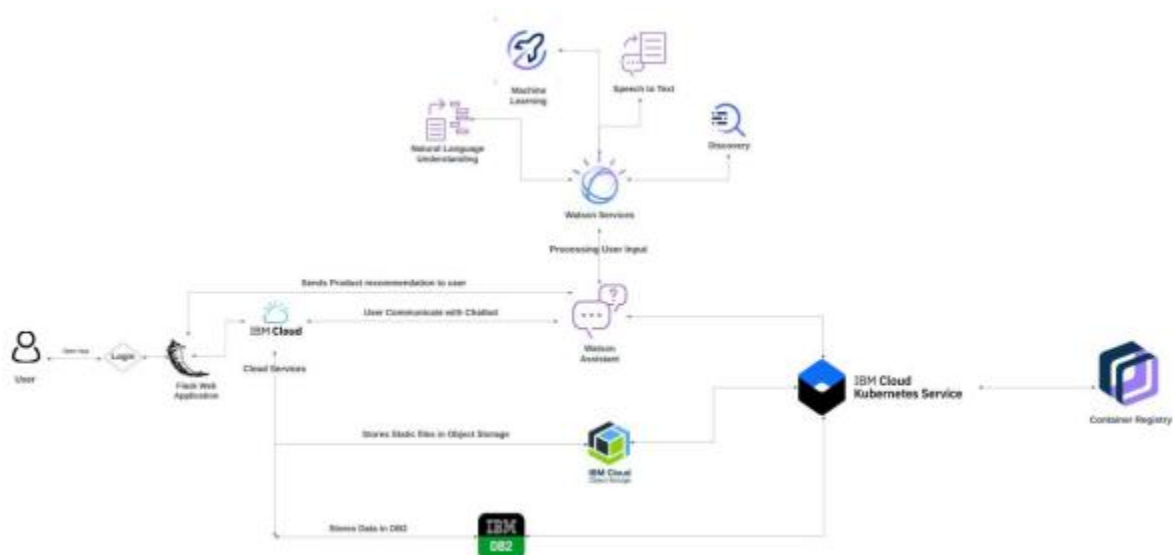

Date	26 September 2022
Project Name	Smart Fashion Recommender Application
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process - with many sub-processes - that bridges the gap between business problems and technology solutions. Its goals are to:

- . Find the best tech solution to solve existing business problems.
- . Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
- . Define features, development phases, and solution requirements.
- . Provide specifications according to which the solution is defined, managed, and delivered.
