CONTAINERIZING THE APPLICATION:

The screenshot displays the Docker Desktop application window. On the left is a dark sidebar with navigation options: Containers (selected), Images, Volumes, Dev Environments (marked BETA), Extensions (marked BETA), and Add Extensions. The main panel is titled 'Containers' and includes a 'Give feedback' link. Below the title is a descriptive sentence about containers and a 'Learn more' link. A toggle switch is set to 'Only show running containers'. A search bar is present in the top right of the main panel. Below these elements is a table listing the containers. One container is listed: 'kind_saha' with ID '90dd6397eafd', using the 'app:latest' image, in a 'Running' state, with ports '5000:5000' mapped, and started '7 seconds ago'. The table has columns for selection, name, image, status, ports, started time, and actions.

		NAME	IMAGE	STATUS	PORT(S)	STARTED	ACTIONS
<input type="checkbox"/>		kind_saha 90dd6397eafd	app:latest	Running	5000:5000	7 seconds ago
